

AVOIDING THE BLANK PAGE SUBJECT MATTER REUSE

Steve Kirkwood | October 9, 2024

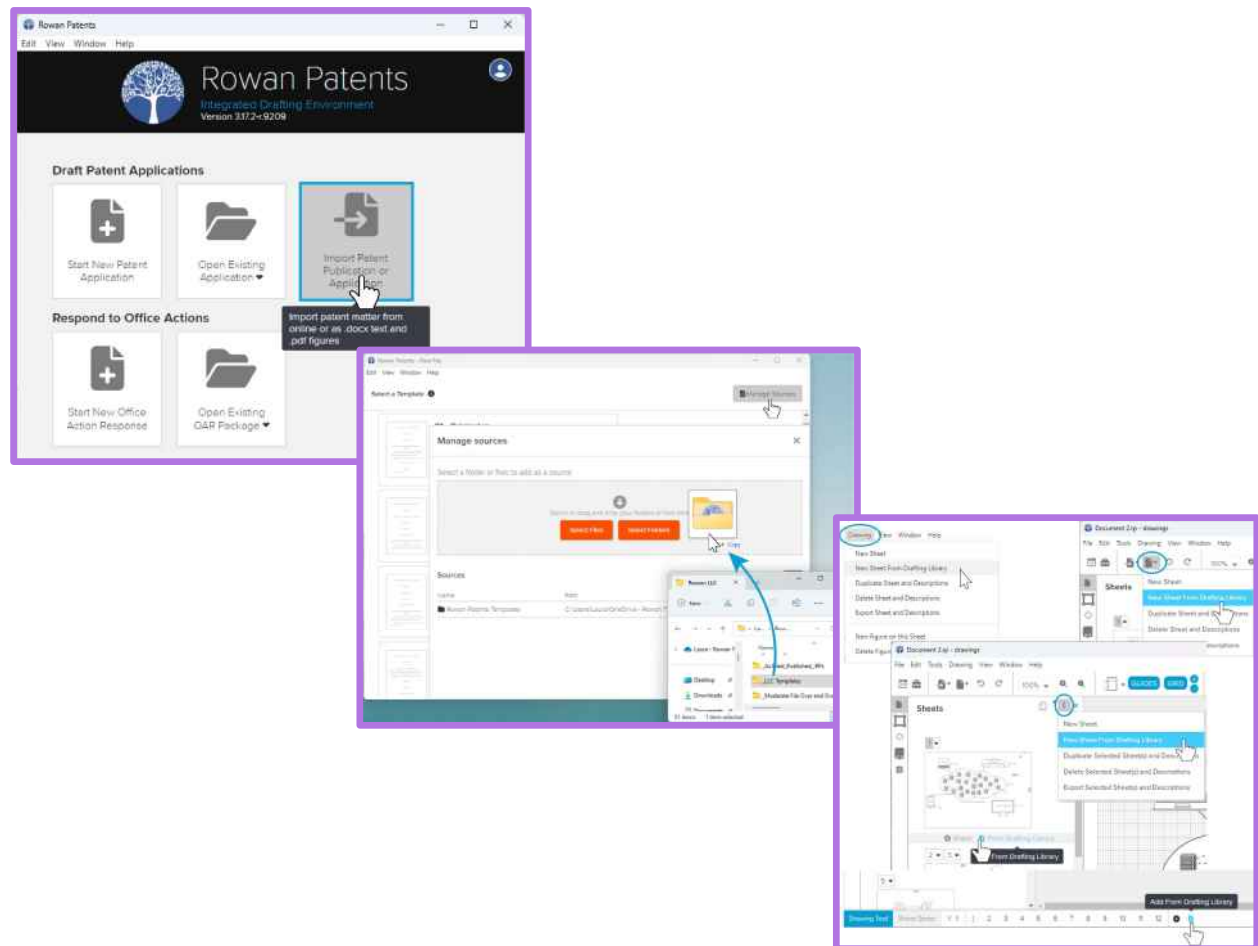

AGENDA

- Intro
- Publication Import
- Templates
- Drafting Library
- Q&A

Thank You Rowan Patents Users!

We appreciate your feedback prioritizing what functionality we add to Rowan Patents. In our last few releases, we have added subject matter reuse features in several areas, including:

- Extended capabilities for conversions of existing patents, patent publications, and unfiled documents.
- The ability to use any existing Rowan document or file path with Rowan documents in it as a source for templates
- The ability to bring in previously used elements with varying levels of granularity.

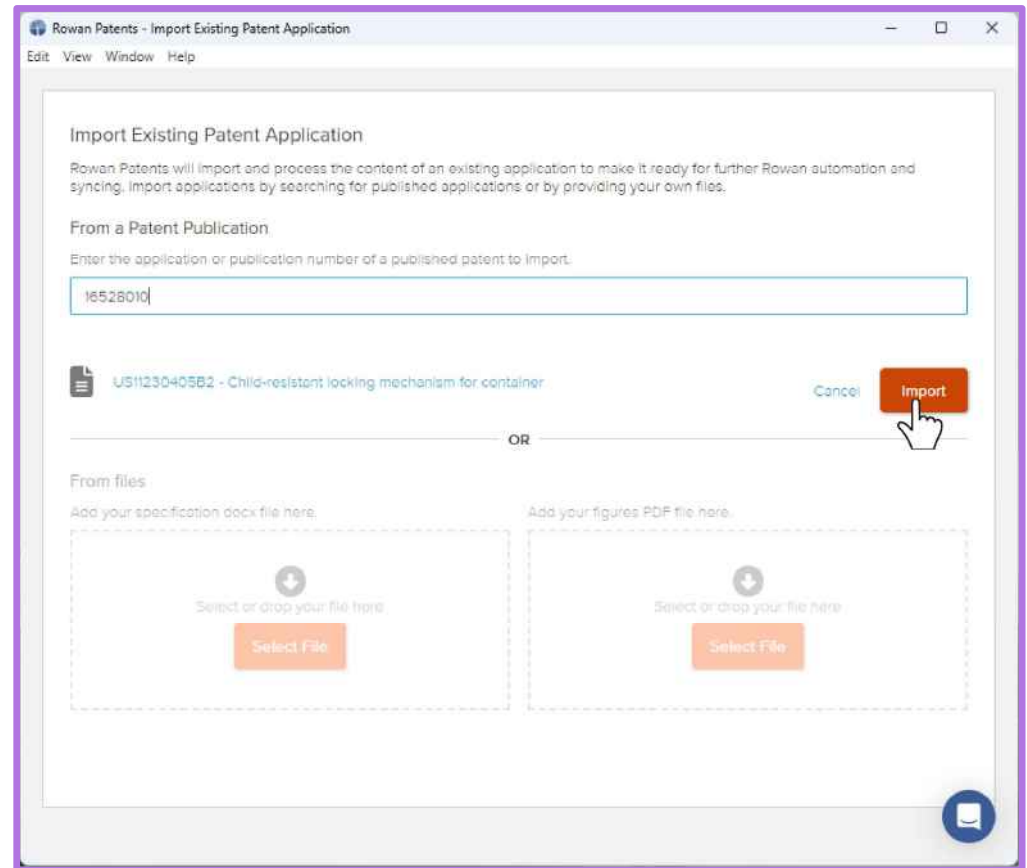

WALKTHROUGH

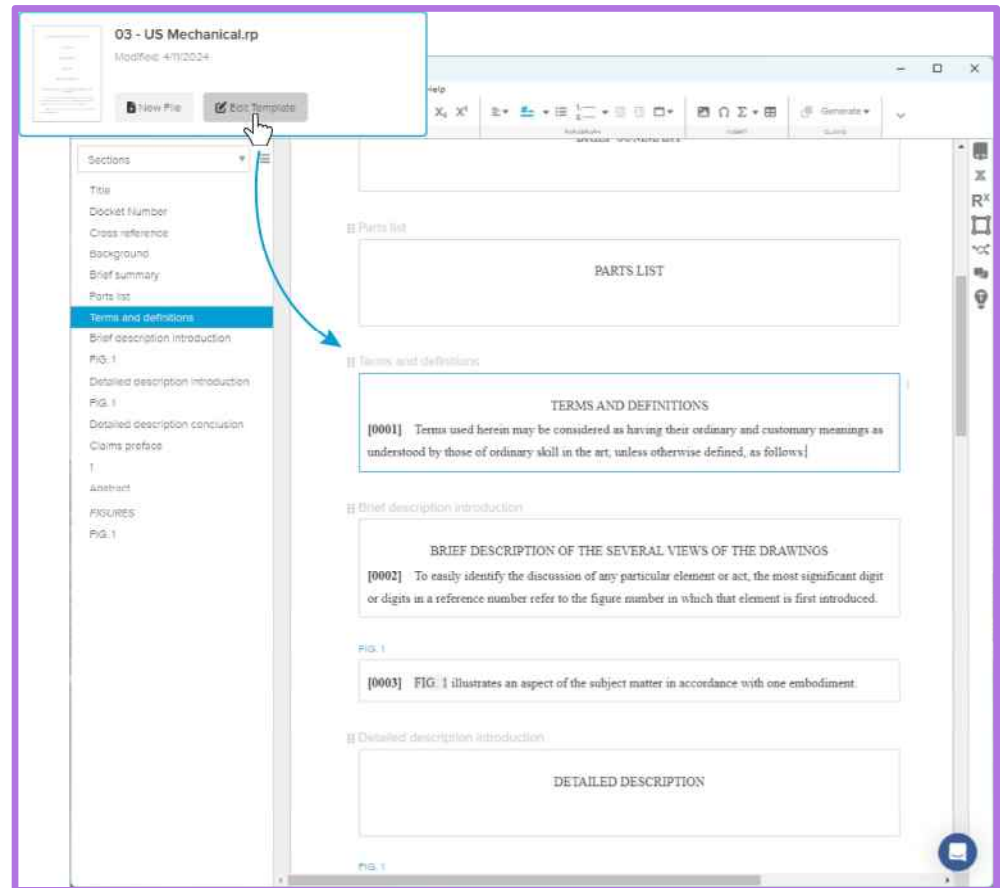

Publication Import

- Use a US granted patent number, US patent publication number or US application number
- Verify the publication
- Use a document in Word's docx format for written portions and pdf formats for figures if not yet published
- Rowan automatically OCR's numbers and overlays to give all of the dynamic application components you are accustomed to using when starting in RP from the start.

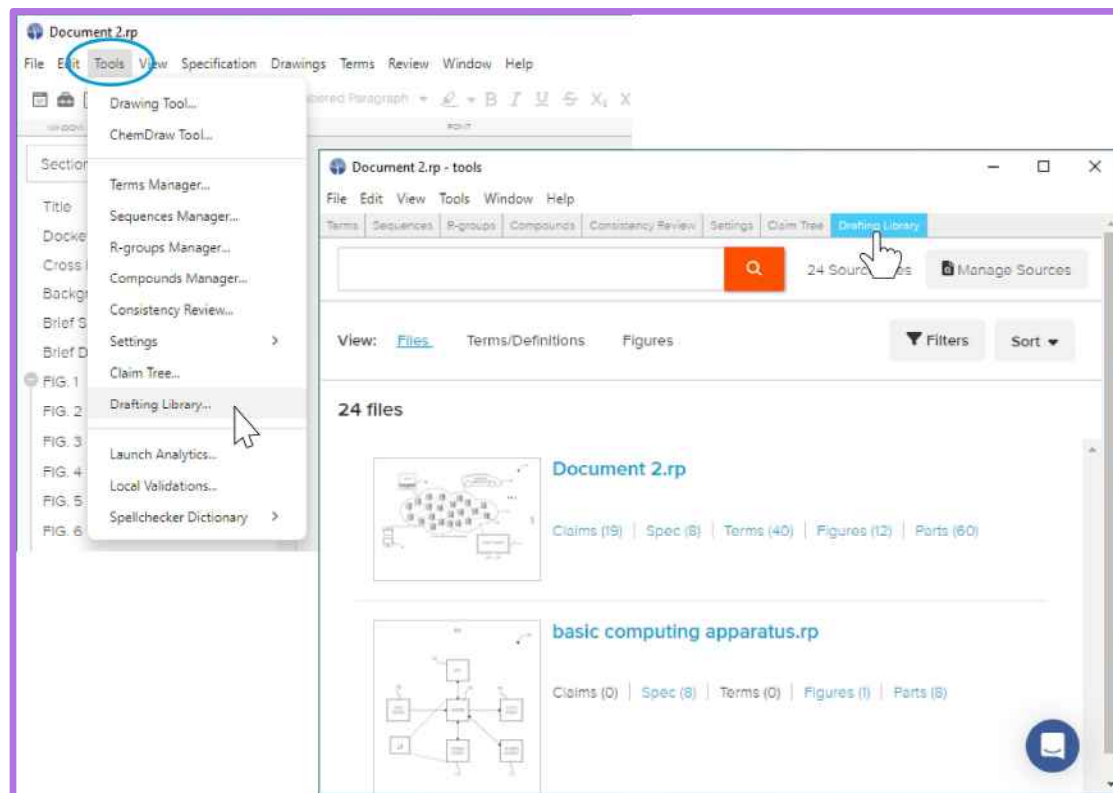

Templates

- Use any file or file path to establish a template
- Show or hide with two clicks
- Flexibility to edit the underlying template or start as a new document

Drafting Library

- Search for components directly from the Preparation software in the Tools Window
- Add item by item as needed
- Choose where to insert certain pieces like new figures
